

Year 5: Art: Mixed Media

Vocabulary

lens	The light-gathering device of a camera	
flash	The camera attachment that produces a brief very bright light, used for taking photographs in poor light	
viewfinder	A device on a camera showing the field of view	
eye-level	The level of the eyes looking straight ahead	
high-Angle	An angle where you are looking down	
low-Angle	An angle where you are looking up	

close-up	A photograph take a close range	
Dutch-Angle	A camera shot that tilts on the camera's "x-axis."	
editing	To change something	
manipulate	To change something	
Crop	To make something smaller	BEFORE CROP  AFTER CROP 
Mixed-media	A variety of media used in a work of art.	

Year 5: Art: Clay / Mod-Roc Masks

Knowledge

- Understand that there are 3 key parts to a camera:
 - A **lens**
 - A **flash**
 - A **viewfinder**
- Understand that you can take photos of the same object from different angles, including:
 - **Eye-Level** Camera Angle
 - **High Angle**: To achieve a **high angle**, either tilt your camera downwards or make sure you're a few inches above your subject and shoot looking down on them
 - **Low Angle**: Choosing a **low-angle** shot requires looking up at your subject from below their eye level, and shooting upwards (this might involve sitting down or squatting).
 - **Close-up Shot**: A typical **close-up** camera shot would include your subject's face from the forehead to their chin. Or, it can focus on one specific detail. This type of shot would be taken using an eye level camera angle, to capture the facial features perfectly.
 - **Dutch-Angle-Shot**: The Dutch angle is a camera shot with a tilt on the camera's roll axis. Also known as the Dutch tilt or canted angle, this shot produces a viewpoint mirroring a tilt of the head.
 - The **Dutch-Angle** is a technique, used to portray a sense of uneasiness or tension.

- To know that I can change what a photo looks like by using editing programmes
- To know that I can change the part of the photo which I want by using the symbol 
- To know that I can crop a photo image using the icon 
- To know that natural light refers to light created by natural objects in the world (the sun, moon etc)
- To know that artificial light refers to light created by man-made objects (street-lights, torches etc)
- Know that we can use everyday items to create effects on our photos
- To know that the angle of light can affect a photo
- To continue to use the **editing** software on the apple photos app
- Understand that **mixed-media** is artwork that uses more than one artistic technique e.g. photography and drawing
- To understand that we can use cellophane overlay on top of I-pads photo to create a mixed-media piece.
- To understand that we can use hatching, cross-hatching and stippling to create dark and mid-tones

Quizzing		Quiz at home
<i>Ask your partner the questions below. Can they find the correct answer on the right-hand side?</i>		<i>Ask your adult to look at the KO.</i> <i>Quiz them using the vocabulary and knowledge section or the quiz questions.</i> • Can they beat your score? • Can they score more than 5? • Compete with your adult in the elimination quiz. Take it in turn to ask each other questions. The first person to get a question wrong is out.
Which part of the camera do you look through?	Artificial light	
Is a 'flash' on a camera a natural or artificial light source?	viewfinder	
Which angle would you take a photo at if you wanted to convey unease?	Eye-level angle	
Which angle would you take a photo at if you wanted to convey that something was very big?	Mixed media	
What is the process called where you change a photo?	Dutch angle	
What is the type of artwork called where you use different mediums in the same piece?	Natural light	
	Low angle	
	Abstract art	
	Editing	
		
Big Questions		
1. Why do you think that photographers want to take photos at different angles? 2. What are some of the every-day items you can use to create effects on your photos? 3. What other media types do you think you could use with photography in order to create mixed-media artwork?
